## November Brings Floral Dollar and Unit Growth

*Despite the federal government shutdown and pressure on income for many, floral sales continued to accelerate in November. Dollars gains were boosted by inflation and demand growth. Roses and bouquets were instrumental in securing sales and growth.*

## PERFORMANCE

### Retail Floral Sales in the Latest Four and 52 Weeks

November, including the Thanksgiving holiday, generated \$635 million in floral sales, about \$85 million more than October. This signals a clear holiday-driven lift. Inflation combined with growing demand pushed dollar sales up 8.1% year-over-year, while unit sales increased by 2.1%.

This strong dollar and unit performance helped improve the 52-week outlook. Annual floral sales exceeded \$10 billion, up 5.7% year-over-year. While unit sales remain slightly below year-ago levels, the gap continues to narrow and now stands at -1.3%.

Floral department	Dollar sales	Dollar % change vs. year ago	Unit sales	Unit % change vs. year ago
4 weeks	\$635.1M	+8.1%	51.7M	+2.1%
52 weeks	\$10.21B	+5.7%	962.5M	-1.3%

 "I was pleased to see strong floral results in a month affected by the federal shutdown and the second-lowest consumer confidence reading in years. It truly underscores the importance of fresh flowers during challenging times."

-Colleen Fagundus, IFPA's Director of Floral

## SALES BY TYPE

### Bouquets and Roses Had a Very Strong November

Roses and bouquets drove the majority of the \$635 million in floral sales, at \$125 million and \$121 million, respectively. Potted plants were a close third. Whereas bouquets and roses grew dollars and units, potted plants lost ground compared with November 2024, especially in unit sales.

Holiday bouquets also had a good month, with solid increases on monthly sales of \$58 million.
